DESCRIPTION OF THE TOUR:

Our first observation point will be Picadas Reservoir where you can see the largest Spanish Eagles, Golden, Spanish Imperial and Short-toed. Also you can observe many passerine In a comfortable walk along the shore of the Reservoir. Vegetation of the area consists of Mediterranean forest and Umbrella Pines.

Then we'll go around the Cofio River in search of the Black Stork. In this area it has a few breeding pair and is not difficult to see them flying over. The Black Vulture also has some breeding pairs in the Resin Pines that abound there. Also we will try to find Dipper and some other forest species in an environment of very amazing Umbrella Pines inhabited by Azure-winged Magpie and Eurasian Jay .

SPECIES OF BIRDS TO OBSERVE:

Black and White Stork, Black and red Kites, Black and Griffon Vultures, Northern Goshawk, Spanish Imperial, Golden, Booted and Short-toed Eagles, Common Kestrel, Eagle Owl, Great Spotted Cuckoo, Red-necked Nightjar, Kingfisher, Grag Martin, Red-rumped Swallow, Thekla Lark, Black-eared Wheatear, Blue Rock Thrush, Golden Oriole, Azure-winged Magpie, Rock Sparrow, Hawfinch, Common Crossbill, Rock Bunting, among others. Sightings of listed species depends on the year's time of the visit.
